

Hassan Murtaza

Full Stack Developer | Backend-Focused | AI-Integrated Workflows

Lahore, Pakistan | +92 309 0001571 | hassanmurtaza.dev@gmail.com | github.com/hassanmurtaza1998
| linkedin.com/in/hassan-murtaza-dev | https://portfolio-hassan-murtaza.vercel.app/

PROFESSIONAL SUMMARY

Full Stack Developer with a strong backend foundation (Node.js, Nest.js, Express, MongoDB, microservices) who has expanded into modern frontend development leveraging AI-assisted workflows to deliver production-ready React/Next.js applications. Experienced in end-to-end ownership: architecture, API design, cloud deployment (AWS, GCP, Azure), real-time systems, and payment integrations across healthtech, edtech, and e-commerce domains.

TECHNICAL SKILLS

- **Frontend:** React.js, Next.js, TypeScript, JavaScript, Redux Toolkit, Zustand, TanStack Query
- **Backend:** Node.js, Express.js, REST APIs, GraphQL, JWT Authentication
- **Databases & CMS:** MongoDB, Firebase (Auth, Firestore, Storage), Strapi CMS
- **AI & Real-Time:** OpenAI, Azure OpenAI, Socket.IO, WebSockets
- **UI & Styling:** Tailwind CSS, Material UI, Ant Design, Chakra UI, Shadcn UI, Bootstrap, SCSS
- **Data Visualization & Animation:** Recharts, ApexCharts, Chart.js, Framer Motion, GSAP
- **Payments & Integrations:** Stripe, Monime (Orange Money), Maya API, eSIM API
- **Cloud & Deployment:** AWS, GCP, Azure, Vercel, Netlify, GitHub Actions
- **Tools:** Git, GitHub, Postman, ESLint, Prettier

WORK EXPERIENCE

Associate Software Engineer — DeepQuery Ltd, Lahore

January 2025 – June 2026

- **Built and deployed end-to-end web applications** using React/Next.js and Node.js, delivering seamless user interfaces and high-performance backend systems.
- **Managed relational and non-relational databases** (MongoDB, PostgreSQL, MySQL, Supabase), optimizing complex queries and ensuring data integrity across multiple client projects.
- **Implemented secure API integrations and real-time communication protocols**, enhancing application scalability and interactive user engagement.
- **Handled server configurations and application hosting** on AWS EC2 and Vercel environments, troubleshooting deployment and environment-specific issues.

Backend Developer — 724.One

January 2023 – December 2024

- **Built and managed server-side logic** using Node.js, Express, and FastAPI to power AI and SaaS platforms.
- **Designed and handled databases** like MongoDB, PostgreSQL, and MySQL, making sure data flows smoothly and safely.
- **Created and integrated secure REST APIs** and connected third-party services like webhooks and login systems.
- **Added real-time features** using Socket.io and managed background tasks to make applications faster.

KEY PROJECTS

Bud Bazzar — E-Commerce Platform | budbazzar.com

Tech: React.js, Node.js, Express, MongoDB, Socket.IO, AWS, Hostinger

- **Marketplace Backend Development:** Engineered a robust, multi-vendor e-commerce backend from scratch for **Budbazzar**, supporting inventory management, real-time order processing, and secure transaction workflows.
- **Scalable Order Systems:** Designed efficient database schemas to handle high-volume product catalogs and order lifecycle tracking (Order Creation, Payment Processing, Delivery Status).
- **Performance Optimization:** Integrated optimized API endpoints for product searching and filtering, ensuring smooth UI interactions for a seamless shopping experience.
- **Infrastructure Management:** Managed deployment on AWS, focusing on system reliability, auto-scaling, and environment-specific configuration for consistent production performance.

Brixone Spaces — Real Estate Portal | brixonespaces.com

Tech: React.js, Node.js, Express, MongoDB, AWS

- **End-to-End Backend Architecture:** Designed and built scalable RESTful APIs from scratch for a luxury real estate portal (**Brixone Spaces**), ensuring high-performance server architecture.
- **Advanced Search & Filtering:** Implemented optimized database indexing and queries to handle complex multi-attribute property filtering (location, price, type) with minimal latency.
- **Access Control & Media Uploads:** Integrated role-based access control (RBAC) for managing listings, agents, and users, along with secure cloud storage for high-resolution property media.
- **AWS Deployment & DevOps:** Deployed and configured the production app on AWS (EC2) using PM2, implementing reverse proxies, SSL encryption, and secure environment management.

Moshlay Printing | moshlayprinting.com

Tech: React.js, Node.js, Express, MongoDB, AWS

- **Custom ERP Development:** Architected and developed a full-stack ERP system for **Moshlay Printing** to streamline internal operations, including order management, production tracking, and inventory control.
- **Business Logic Automation:** Implemented complex workflow automation to bridge the gap between order intake, production status updates, and final delivery, significantly reducing manual data handling.
- **Role-Based Data Access:** Integrated granular RBAC to ensure secure data access for different user levels (e.g., Admins, Shop Floor Managers, and Sales Staff), maintaining strict information security.
- **Reliable Infrastructure:** Deployed the solution on AWS, configuring secure server environments, database backups, and optimized API routes for real-time reporting.

7 - O- Moons | 7omoons.com

Tech: React.js, Node.js, Express, MongoDB, AWS

- **Custom ERP Development:** Architected and developed a full-stack ERP system for **Moshlay Printing** to streamline internal operations, including order management, production tracking, and inventory control.
- **Business Logic Automation:** Implemented complex workflow automation to bridge the gap between order intake, production status updates, and final delivery, significantly reducing manual data handling.
- **Role-Based Data Access:** Integrated granular RBAC to ensure secure data access for different user levels (e.g., Admins, Shop Floor Managers, and Sales Staff), maintaining strict information security.
- **Reliable Infrastructure:** Deployed the solution on AWS, configuring secure server environments, database backups, and optimized API routes for real-time reporting.

Plainfield Lumber — Hardware Business E-Commerce Platform | plainfieldlumber.com

Tech: React.js, FastAPI, Python, MongoDB, Socket.IO, AWS

- **B2B/B2C Catalog Backend Engineering:** Architected and engineered a comprehensive product catalog backend from scratch for a building materials platform (**Plainfield Lumber**), handling thousands of SKUs and complex product hierarchies.
- **High-Volume Data Categorization:** Designed optimized database schemas and search queries to manage diverse inventory categories (lumber, hardware, building materials) with efficient attribute filtering.
- **Quote & Inquiry Management:** Developed backend workflows for contractors to request bulk pricing quotes, managing multi-tier pricing logic and automated email routing for sales teams.
- **Cloud Infrastructure & Monitoring:** Provisioned and managed AWS infrastructure, optimizing server response times for heavy product data traffic while ensuring high uptime using PM2.

Rankk — Create Compete Promote | rankk.app

Tech: React.js, FastAPI, Python, Socket.IO, AWS

- **Full-Stack Product Development:** Conceptualized and developed the complete full-stack architecture from scratch for an AI-powered SEO analytics platform (**Rankk.app**).

- **Dynamic Dashboards & Analytics:** Built interactive frontend dashboards to visualize complex SEO metrics and website audit reports, integrating them seamlessly with high-performance backend APIs.
- **AI & Third-Party Integrations:** Implemented secure server-side logic to handle external AI APIs (OpenAI/Anthropic), managing asynchronous background workers for heavy data processing.
- **AWS Production Deployment:** Deployed and maintained the full-stack application on AWS using PM2 and Nginx, configuring SSL certificates and optimizing server response times.

Medaibility — Medical Education Platform | medaibility.com

Tech: React.js, NodeJS, Microservices, AWS

- Contributed to a microservices-based medical education platform, implementing modular backend services and inter-service communication for scalable, independently deployable feature modules.

Patterdale Peds Online — Digitally Dog's Breed Registry Platform | [patterdale-peds](https://patterdale-peds.com)

Tech: React.js, Node.js, Express.js, MongoDB, Firebase, JWT

- **Healthcare Web Application Development:** Developed and deployed a responsive web application for a pediatric clinic (Patterdale Peds), focusing on seamless user onboarding and accessible healthcare resources.
- **Dynamic Booking & Patient Forms:** Built interactive scheduling flows and intake forms with strict client-side validation to collect sensitive medical histories accurately.
- **Performance Optimization:** Optimized frontend assets and state management to ensure ultra-fast loading times, achieving high performance scores on modern deployment platforms like Netlify.
- **API Integration & Security:** Integrated secure RESTful APIs to handle patient data, ensuring proper handling of private information and smooth synchronization between the UI and backend databases.

Winco AI — Multi-Tenant EdTech SaaS Platform | [winco-ai-admin-panel](https://winco-ai-admin-panel.com)

Tech: React.js, Node.js, Express.js, MongoDB, Azure OpenAI, Socket.IO, Telegram Bot App, Azure, Mobile Money

- **Enterprise Admin Portal Development:** Architected and engineered a secure, high-performance administrative dashboard (Winco AI Admin Panel) to centralize business operations and monitor AI system metrics.
- **Data Visualization & Analytics:** Integrated advanced data tables and interactive charts to display real-time usage statistics, system logs, and user activity metrics with optimized rendering.
- **Dynamic Role-Based Operations:** Built complex state workflows and protected routes, ensuring proper separation of duties and secure operation privileges for different administrative tiers.
- **State Management & Performance:** Implemented a robust client-side state management architecture (e.g., Redux Toolkit / Context API) to minimize re-renders while handling heavy, deeply nested JSON payloads from backend services.

BySim — eSIM Management Platform | [BySim Play Store Link](https://by-sim.com)

Tech: React.js, FastAPI, Python, Socket.IO, AWS

- Integrated eSIM and Maya APIs to enable package management, QR-code-based activation, and admin-side eSIM tracking workflows.

EDUCATION & CERTIFICATIONS

Bachelor of Science In Information Technology — University Of Okara | Batch 2018 –2022

Certification: MERN Stack Developer — Hazza Institute of Technology, Islamabad
